

SKIP NOVAK

TAMES THE MAIN WITH HARKEN

“When I think back on the bloodied hand-and-finger struggles I’ve had reefing, the Harken Battcar system is a dream come true. A reliable and smooth-running mast track system is a must for a vessel like *Pelagic Australis*. We regularly operate in 30-knot plus winds and reefing easily, especially downwind in big seas where it is not prudent to come into the wind, is of paramount importance.”

—Skip Novak
Pelagic Expeditions
